TP-Link End of Life Products

official statement

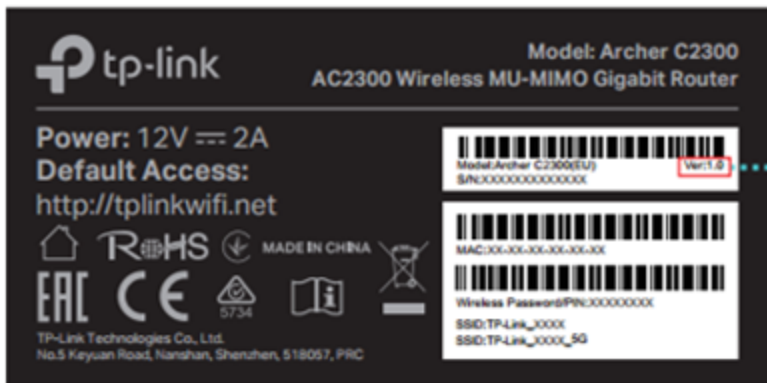

Updated 04-14-2026 00:12:22 AM

197823

This end-of-life page will be the new home of TP-Link’s end-of-life product list. What is an end-of-life product you might ask? End-of-life products are products where the production has either ended on the model or the specific version of the model. How does this affect our customers? In most cases, it won’t affect you at all. The only time that it might be when a warranty claim is required to resolve a manufacturer defect in a product you own. If you are still within the product warranty and your product is EOL (end-of-life) it means that there may no longer be any inventory available, and an alternative model may be sent. In most cases, we will send a direct equivalent model but in times when one is not available an upgrade or a model as close to the specifications of your original product will be sent. During these occurrences, TP-Link may contact you with a few options to choose from. Please see the [End-of-Life Policy](#) for more details. Please [contact us](#) to further assist with replacement parts for products and services.

*This list is constantly being updated and subject to change without notice.

Note: You can check your product’s model and hardware version on the label of the product. If no version is shown, that means the product is version 1 or “v1.” Please refer to [How to Find the hardware version on a TP-Link device](#) for more details.
